

SuperCling – Removable Adhesive Vinyl

Can be applied to a variety of surfaces

SuperCling removable adhesive vinyl is an ideal medium for point-of-purchase advertising, signage, promotional items, decals, labels and more. It is designed for short and long term applications on glass or other glossy surfaces but also for use on surfaces such as metals, woods, plastics, and most smooth wall surfaces. Easy long-term removability (up to 6 months) without leaving any residue behind.

Clear SuperCling is ideal for storefront window applications and beverage cooler signage due to the contact clarity the film provides.

White SuperCling is great as a wall graphic media. We do recommend testing adhesion of printed SuperCling pieces to your wall surfaces, especially if it has a laminate.
